August 19, 2010

To: Whittemore-Peterson Institute for Neuro-Immune Disease:

Hope is so important to our patient community. The years of having a debilitating disease and being neglected by other institutions left us discouraged. Your center has become an oasis in our desert of despair.

We congratulate WPI for bringing back hope and energizing an unprecedented advocacy effort. As our patient group focuses on the ad campaign, we thank WPI for a discovery that is creating public attention to our needs. We hope your XMRV foundation, along with widely distributed advertisements, will bring public support for increased government-funded biomedical research, possibly to your center.

We celebrate with you,

ME/CFS Worldwide Patient Alliance
